## Working With A Built-In Appliance Cabinet

All Cabinets.com European Frameless appliance cabinets are manufactured with a front panel that is intended to be modified on-site to fit specific appliances. This allows flexibility to fit a variety of appliance makes/models and gives the ability to get a custom fit. It is important to understand what appliance types work best and where additional on-site accommodations may be needed for specific appliances. Be sure to consult the appliance manufacturer's installation instructions for specifications on minimum and maximum cutout size requirements.

## Tall Microwave Cabinet (BDB2)

This cabinet has a 21" high center panel and is intended for a wall-mount built-in microwave/trim kit. Refer to the cutout chart to determine the maximum cutout sizes allowable. It is recommended that a Tall Oven Cabinet be used for wall-mount ovens, as the center panel is taller and will more readily accommodate a full-size wall oven; consult with your Cabinets.com Designer for more information.
