Working With A Built-In Appliance Cabinet

All Cabinets.com European Frameless appliance cabinets are manufactured with a front panel that is intended to be modified on-site to fit specific appliances. This allows flexibility to fit a variety of appliance makes/models and gives the ability to get a custom fit. It is important to understand what appliance types work best and where additional on-site accommodations may be needed for specific appliances. Be sure to consult the appliance manufacturer's installation instructions for specifications on minimum and maximum cutout size requirements.

Tall Single Oven Cabinet (31.5-B)

This cabinet has a 31-1/2" high center panel and is intended for a single full-size built-in oven. Refer to the cutout chart to determine the maximum cutout sizes allowable. It is recommended that a Tall Microwave Cabinet be used for wall-mount microwaves, as the center panel is smaller and will have less wasted space; consult with your Cabinets.com Designer for more information.

TALL SINGLE OVEN B

Maximum Cut-Out Dimensions

Additional material for oven support is not supplied with this cabinet.

	Oven Panel Max Cut-Out		Doors Height
	A	B	C
