Working With A Built-In Appliance Cabinet

All Cabinets.com European Frameless appliance cabinets are manufactured with a front panel that is intended to be modified on-site to fit your specific appliances. This allows flexibility to fit a variety of appliance makes/models and gives you the ability to get a custom fit. It is important to understand what appliance types work best and where you may have to make additional on-site accommodations to fit your selected appliances. Be sure to consult your appliance manufacturer's installation instructions for specifications on minimum and maximum cutout size requirements.

Wall Appliance Cabinet with Microwave Panel (WA-MWP)

This cabinet is intended for a single microwave oven that is a "built-in" model (a cabinet-mount unit with an accessory trim kit). This cabinet is not intended for a countertop microwave. If you choose to use this cabinet for a non-built-in microwave, any exposed edges that have been cut will be visible.
