

Working With A Built-In Appliance Cabinet

All Cabinets.com appliance cabinets are manufactured with a small framed opening that is intended to be modified on-site to fit your specific appliances. This allows flexibility to fit a variety of appliance makes and models, and gives you the ability to get a custom fit. It is important to understand what appliance types work best and where you may have to make additional on-site accommodations to fit your desired appliances. Be sure to consult your appliance manufacturer's installation instructions for specifications on minimum and maximum cutout size requirements.

Microwave Oven Cabinet with Drawers (MOSD)

This cabinet is intended for a single microwave oven that is a "built-in" model (a cabinet-mount unit with an accessory trim kit) or a drawer-style microwave. This cabinet is not intended for a countertop microwave. If you choose to use this cabinet for a non-built-in microwave, the natural maple interior, as well as any exposed edges that have been cut will be visible. **The vertical stiles on the face frame of this cabinet are wider** in order to accommodate the oven cutout, so the doors have more of a face frame reveal on either side. This cabinet can be custom-ordered to have less reveal; consult with your Cabinets.com Designer.

Maximum and Minimum Cut-Out Dimensions

A loose shelf for oven support is supplied with this cabinet.
