

## Working With A Built-In Appliance Cabinet

All Cabinets.com appliance cabinets are manufactured with a small framed opening that is intended to be modified on-site to fit your specific appliances. This allows flexibility to fit a variety of appliance makes and models, and gives you the ability to get a custom fit. It is important to understand what appliance types work best and where you may have to make additional on-site accommodations to fit your desired appliances. Be sure to consult your appliance manufacturer's installation instructions for specifications on minimum and maximum cutout size requirements.

## Microwave Oven Cabinet with Drawers (MOSD)

This cabinet is intended for a single microwave oven that is a "built-in" model (a cabinet-mount unit with an accessory trim kit) or a drawer-style microwave. This cabinet is not intended for a countertop microwave. If you choose to use this cabinet for a non-built-in microwave, the natural maple interior, as well as any exposed edges that have been cut will be visible. **The vertical stiles on the face frame of this cabinet are wider** in order to accommodate the oven cutout, so the doors have more of a face frame reveal on either side. This cabinet can be custom-ordered to have less reveal; consult with your Cabinets.com Designer.
