

Working With A Built-In Appliance Cabinet

All Cabinets.com appliance cabinets are manufactured with a small framed opening that is intended to be modified on-site to fit your specific appliances. This allows flexibility to fit a variety of appliance makes and models, and gives you the ability to get a custom fit. It is important to understand what appliance types work best and where you may have to make additional on-site accommodations to fit your desired appliances. Be sure to consult your appliance manufacturer's installation instructions for specifications on minimum and maximum cutout size requirements.

Single Oven Cabinet (OVS)

This cabinet is intended for a single oven unit, which allows the double doors below to remain intact. This cabinet may also be used for a built-in-microwave with trim kit, however, additional trim pieces may be required; consult with your Cabinets.com Designer.

Maximum and Minimum Cut-Out Dimensions

A loose shelf for oven support is supplied with this cabinet.

Cabinet	A		B		C	D
	Cut-Out		Cut-Out			
	min.	max.	min.	max.		
OVS2784	20-3/8"	24-5/8"	20-5/16"	30-5/16"	16-11/16"	28-3/4"
